

Here are all the safety measures Come & See Italy has taken to prevent the spreading of covid-19.

Your safety comes first!

On March 14, 2020, the Italian Ministry of Infrastructure and Transport has shared with the employer associations the Regulatory Protocol for the Contrast and Containment of the COVID 19 Diffusion inside workplaces, involving all productive sectors. Regarding the transport and logistics sectors, the ministry has defined further measures. Attention has been drawn to the following common requirements:

STANDARD PROTOCOL TO CONTAIN THE COVID-19 DIFFUSION IN THE LOGISTICS AND TRANSPORTATION INDUSTRY:

- Each company has to nominate those responsible for information regarding the correct use and management of personal protective equipment, (masks, gloves, coveralls, etc.)
- Companies are required to sanitize frequently and appropriately means of transport and means of production
- If possible, companies are required to install hydro alcoholic solution dispensers for passengers
- All travel staff for whom it is not possible to maintain the social distance protocol (at least 1 meter from the user) must use standard PPE (personal protective equipment), as required by the Protocol
- Companies must display the necessary communications inside each vehicle, also by affixing specific signs that indicate the correct user behavior needed for safe service delivery
- Companies must stop passengers from occupying the available seat next to the driver. No more than two passengers may be carried on the rear seats per row of three-seater seats, only one passenger in the two-seat rows. The driver must wear protective equipment.
- If the passengers carried are part of the same family and wear PPE (gloves and mask), they can be transported all together when using a vehicle equipped with special separators.

Standard measures regarding transports

- Our drivers are equipped with the necessary protective devices to carry out the service (mask, gloves and disinfectant gel).
- We provide all customers with disinfectant gel, located inside the vehicles. If necessary, we also provide free of charge protective masks.
- Inside each vehicle, passengers will find a sign indicating the behavioral obligations to follow, in order to guarantee the correct service delivery.

Standard measures regarding tours execution

To start again to welcome people on board, we have bought all the necessary equipment. We would like our clients to be aware of “Come & See Italy: your safety first”, a program that includes:

- Meeting points respecting minimum safety distances, equipped with sanitizing gel.
- Group vehicles (coaches, minivans, cars, etc) undergo certified disinfection before each trip.
- Before accessing the vehicles, participants are invited to disinfect their hands with alcohol-based gel.
- Each customer is has to have a protective mask.
- According to law, the distance between people is guaranteed inside each means of transport.
